

# Peel Ports

# Onshore Gas & Oil

Supply chain solutions for the onshore unconventional gas and oil industry

## The Proposition

**Peel Ports can offer a hub of logistics management to be the supply chain partner for the development of shale gas in the UK. Peel Ports has available infrastructure and support services capable of enabling the UK onshore gas and oil potential.**

A £33bn supply chain spend with 33,000 FTE roles has been identified for the UK as shale resources are developed. As a leading infrastructure business based in the North West of England, Peel Group has the ability to draw from its unique range of assets in critical port services, road, rail, water networks and land and property to reach across all the licenced areas in Bowland Shale reserve and beyond.

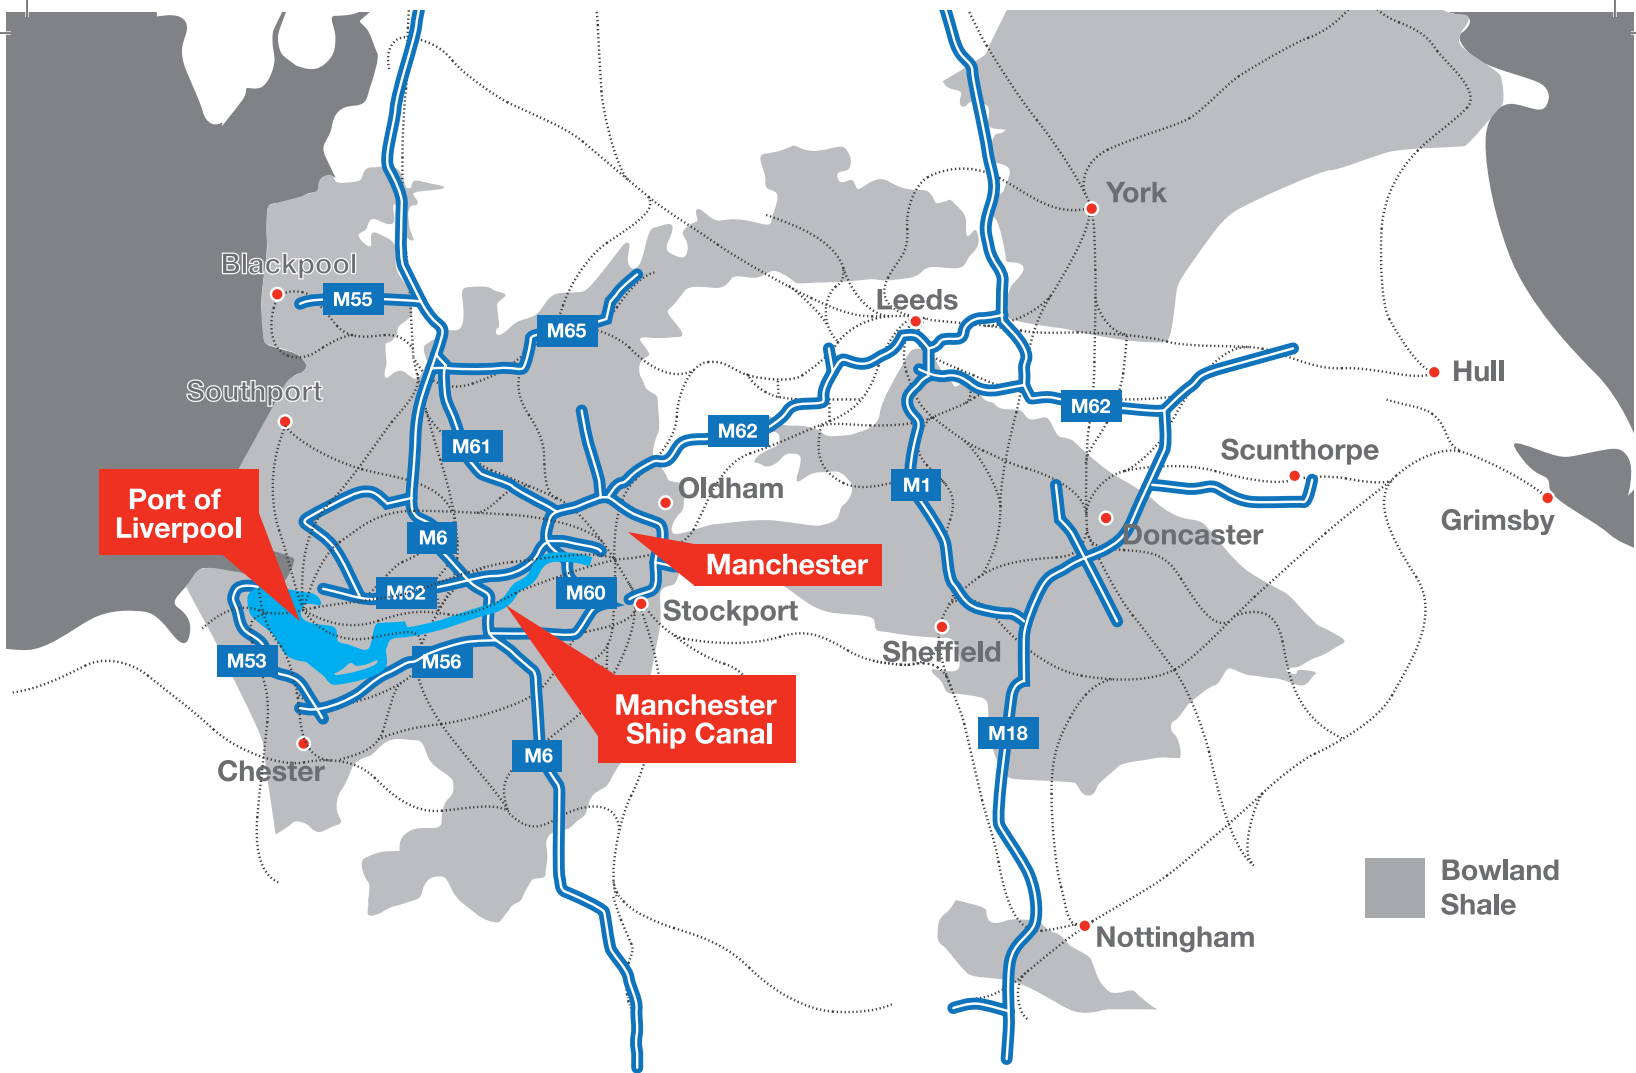

Peel Ports is the vital support component to the shale industry providing a combination of factors essential to the delivery of an efficient sustainable solution for the production of UK shale gas.

- Easy access to inbound steel pipework, casing materials, drilling components and sand through the largest established steel and dry bulk terminals in the UK at the Port of Liverpool
- Excellent connectivity for supply chain components through rail, road and water (including the Manchester Ship Canal) to ease congestion
- Available port centric and landside property options to facilitate component assembly of rigs and supply chain infrastructure and commodities
- Abundance of energy, manufacturing expertise and engineering skills available supported by a cohesive framework of academic and vocational learning across the North West region
- Regional economic support – grant funding and tax incentives to attract companies to locate to the region
- Rebalance the regional economy accelerating recovery and growth
